HIGH SPEED APPLICATIONS

Trailers - Caravans etc., Tyres 6.5-6.8
 Trailers - Caravans etc., Complete wheel assemblies 6.9-6.11

Agricultural

Industrial

Small tyres - Materials handling etc.

Turf - Ground care

Trailer and Caravan

Leisure and Fun

Various

Tubes etc.

Wheels - Axles etc.

Info & Technical

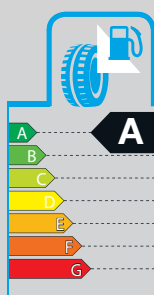

TYRE LABELLING

Which information do you get from the tyre label?

The label has 3 tyre performance indicators:

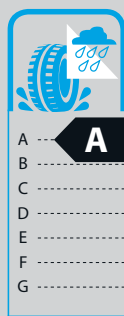

- ▶ Fuel efficiency
- ▶ Wet grip
- ▶ Exterior noise level

FUEL EFFICIENCY

Fuel consumption is influenced by the rolling resistance of the tyres caused by tyre deformation when rotating, resulting in energy losses in the form of heat. The higher the deformation, the higher the tyre rolling resistance and consequently the more fuel is required to move the vehicle forward. In other words, lower rolling resistance means lower fuel consumption and therefore lower vehicle emissions, including CO₂.

The new label will display different grades in “rolling resistance” where A is the most “fuel efficient” and G the least efficient in class. The black arrow next to the grading (A to G) indicates the performance level of the product.

WET GRIP

The most important role of a tyre is to provide safety - in all weather conditions. Wet traction or grip is one of the most important performance characteristics of any tyre.

There is typically a performance trade-off when combining noise, fuel efficiency and safety performances like wet grip. The labelling will allow customers to prioritize for themselves their preferred performances.

The label will display a range of 7 grades where tyres with an “A” provide the highest levels of wet grip and “G” the lowest.

EXTERIOR NOISE LEVEL

Exterior tyre noise levels are split into 3 categories and measured in decibel (dB) in comparison with the new European tyre exterior noise levels to be introduced until 2016.

- ▶ One black sound wave = 3dB less than the future tighter European limit
- ▶ Two black sound waves = already compliant with the future European limit
- ▶ Tree black sound waves = compliant with the current European limit

Kenda Kargo Pro

GT - KargoMax ST-4000

TRAILERS - CARAVANS ETC.

Tyres

STARCO KARGO TRAIL

- for single axle trailers and tandem trailers

- ▶ Modern tread design
- ▶ Low rolling resistance according to EU tyre labelling
- ▶ Low heat build-up
- ▶ Economical construction/weight
- ▶ Medium wide grooves - long life
- ▶ M+S marked

STARCO MASTER TRAIL

- for single axle trailers, tandem trailers, triaxles and HD application

- ▶ Modern tread with special aligned tread and profile designed to match operating conditions
- ▶ Low rolling resistance according to EU tyre labelling
- ▶ Low heat build-up
- ▶ Unique high quality free rolling tyre
- ▶ Special designed construction to prevent air escapes
- ▶ Aligned with the new tyre label legislation
- ▶ M+S marked

STARCO ECOTRAIL

- for single axle trailers and Mid range tandem trailers

- ▶ Modern tread design
- ▶ Low rolling resistance according to EU tyre labelling
- ▶ Low heat build-up
- ▶ Cost-efficient tread compound
- ▶ Economical construction/weight
- ▶ Wide grooves – save weight
- ▶ M+S marked

NEW!

NEW USER FRIENDLY HIGH SPEED TYRES FROM STARCO

- ▶ Best sidewall marking in the market
- ▶ Clear identification of max load, speed and inflation pressure

	Ball bearings Axle shaft		Item number (conforming to EAN-13)
	Built-in height		Tyre, diameter
	Fitting plate, dimensions		Tyre, section width
	Fitting holes, distance		Load, single tyre
	Axle, diameter		Load, carrying wheel
			Load, steering wheel
			Speed
			Inflation pressure
			E-marked
			Fuel efficiency
			Wet grip
			Exterior noise level
			Load variation (in relation to speed)
			Measuring Rim Width (other options are usually permitted)
			Valve, type
			No. per box
			Single packed tubes
			Studs, no.
			DCB, Diameter Centre Bore (mm)
			PCD, Pitch Circle Diameter
			Bore
			Hub length
			Bolt, diameter
			Bearings, type
			Plain bearings
			Roller bearings
			Ball bearings
			Direct bore, no bearings
			Plain bearings Axle shaft
